

The Galaxy Audio Camera Kits are designed to provide a wireless audio signal for field videography or live feed audio transmission with rugged yet lightweight components. The Camera Kit will transmit audio from any of the AS-TV transmitters directly to the AS-TVBPR receiver for recording audio for your camera system. The AS-TVBPR features a line output that allows direct hook up from the receiver to the camera, plus a headphone output for direct monitoring of the audio feed. Both the TVBPT & AS-TVBPR feature internal rechargeable lithium batteries for up to 16 hours of operation.

The Galaxy Audio Camera Kit includes your choice of transmitter: TVHH Handheld, TVH2 Compact Handheld, TVMBP Body Pack with either the HS-U3BK headset or LV-U3BK lavalier microphone, or the TVBPT Pendant transmitter with built in microphone.

\*Video Camera not included
