

### Included Components

1. GPS-8 x1
2. IEC Power Cable x1
3. Quick Start Guide x1

### Setup

1 Connect power cable to GPS-8, connect other end to a power outlet.

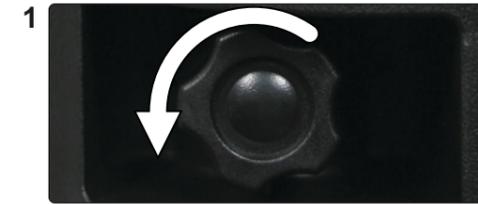

2 From your mixer or source, connect an XLR or 1/4" Cable into the Combo Jack Input located on the back of the GPS-8.

3 To loop to a second GPS-8, connect an XLR female into the output and the male end of the cable to the input of the second GPS-8.

### Stand Mounting (Optional)

1 Loosen the knob on the back of the GPS-8 by turning counter-clockwise to ensure there is no obstruction in the mounting hole from the fastener.

2 Lift the GPS-8 over the speaker stand and align it up with the hole.

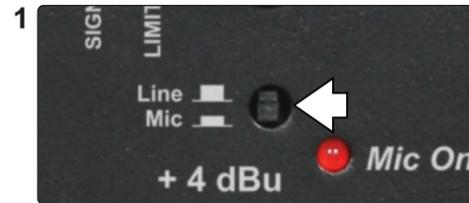

3 Bring the GPS-8 down onto the speaker stand gently until it is fit snugly.

4 Tighten the fastener by turning the knob clock-wise until snug.

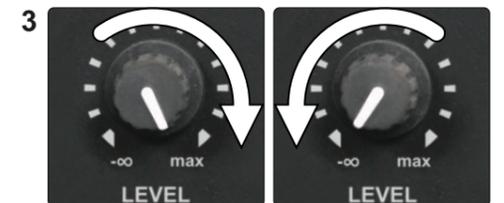

### Operation

1 For Line Level input, the button should be in the up position. For Mic Level input, press the button in, the Mic On LED will light up.

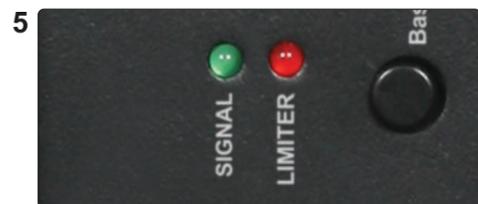

2 Insure the input level control is turned down (fully counter-clockwise) Turn the power switch on.

3 Level control: turn clockwise to raise the level. Turn counter-clockwise to lower the level.

4 To enhance the low frequencies, press the Bass Boost button.

5 The green signal LED indicates you have input signal. The Red Limiter indicates too much signal. If lit, turn the input down.

The GPS-8 is a versatile speaker which can be mounted on a speaker stand as well as be used as a wedge on stage.

## Quick Start Guide

## FAQ

- 1. Q. Can the GPS-8 be used outside of the US?**  
A. Yes, but you must change the mains switch to the proper voltage for your location.

- 2. Q. Can I plug a microphone directly into the GPS-8?**  
A. Yes, but it must be a dynamic mic. There is no Phantom Power for condenser mics.
