

New Galaxy Trek GTU UHF Portable Wireless Mic System: More Range, Options and Freedom

WICHITA, Kan. – Galaxy Audio expands its popular Galaxy Trek line with the new Galaxy Trek GTU UHF Wireless Mic System. This latest offering from Galaxy Audio delivers powerful yet user-friendly portable miking options for live vocal, presenter, event, and instruction applications.

More Range & Multiple UHF Frequency Portable Wireless Mic Options

The Galaxy Trek GTU features 160-foot range and UHF frequency wireless transmitter options with choice of handheld, headset, or lavalier mics. Users can mix and match their system. The compact dual mic receiver enables use of any two of the microphone transmitter options simultaneously.

Creates a Versatile Wireless PA System in Seconds

Users can create a versatile wireless PA system by combining the Galaxy Trek GTU with a powered loudspeaker. This is an easy and ideal solution for classroom instruction, religious ceremonies, sports coaches, corporate and trade show presenters, fitness instructors, auctioneers, weddings and more. In addition to speakers, the Galaxy Trek GTU receiver can be plugged into the 1/4" input of mixers, cameras and more for instant wireless connectivity. The system includes a 1/4" to 1/8" adapter for smart devices.

The Galaxy Trek GTU incorporates Auto Match Pairing to connect transmitters to an open channel. Users simply turn on the receiver and one or both transmitters to seamlessly sync.

STREET PRICE - \$129.99 to \$209.97
